

Palionisos Bay

Acces:

The new Road via Skalia to Palionisos. Continue with a dirt road, passing Nikolas Taverna, to the beach. From there left up to a small house, continue along a fence and then scramble up the hill to the obvious crag with the orange roof.

All routes cleaned and with lower-offs, 30m.

- 1 **Iltis**, 6b *** - a natural line, various, technical, with some tiny holds
- 2 **Iltis Extension**, 7a *** , 15m, bridging at the roof, but hard at the end
- 3 **Baden mit und ohne**, 7a *** - almost every bolt a new grade
- 4 **Novembersonne**, 7b *** - the fingery technical slab
- 5 **67**, 6b+ *** - at the black tufa holds go straight!
- 6 **Fingerpull**, 6a+ *** - the name tells the story...right at the top
- 7 **British Pubbull** 5c+, *** - steep above the big hole
- 8 **No Sprit, No Station**, 5c *** - the wall with fingery holds
- 9 **Corax**, 5b *** - a pair of corax watched what we've been doing
- 10 **Colchicum autumnale** 5a, ** - it's only one delicate technical move
- 11 **TakTakTak** 4b, ** - nice, but the sound of the island was disturbing

November 2010, 1 and 4 – 10: Angie Hafner, Hans Weniger, Christian Schmidt (Drilling Gang) / Nr. 2/3/4 – Bernd & Christine Arnold and Drilling Gang
